

Richard D. Lee is the Integrated Pest Management Specialist for the Bureau of Land Management, a position he has held for the last seven years. Prior to coming to the BLM, he was the Extension Weed Specialist for the New Mexico State University Cooperative Extension Service for 18 years. Educational background consists of the family dairy farm in Northern Utah, B.S. and M.S. from Utah State University and a Ph.D., in Weed Science, from Ohio State University. He is presently responsible for the IPM/Pesticide Certification Program for the BLM and organizes three training sessions each year, along with addressing issues associated with the pest management program for the Bureau. He continues to organize and participate in the Southwest Noxious Weed Short Course, a course organized 16 years ago, and has assisted other Federal Agencies with their IPM Training.
