VACANCY ANNOUNCEMENT

**Title:** GIS and Reclamation Specialist

**Description:** Fremont County Weed and Pest District is seeking a self-motivated and innovative individual to take on survey, inventory, mapping, and reclamation field operations on private and public land within the county. The individual selected will need to be able to identify common native vegetation and uncommon non-native vegetation to the species level. Experience and knowledge of rangeland reclamation is desired. The ideal candidate will possess the necessary skills to operate GIS technology both in the field and in an office setting. In addition, the successful candidate will possess working knowledge of computers and a desire to keep up with advancing computer technology. The ideal candidate will be able to provide minor IT assistance for the district. This position is given significant latitude to accomplish these tasks.

**Education and Experience:** Bachelors’ Degree in ecosystem science, reclamation, ecology, geography, or a closely related field and or significant work related experience.

**Working Conditions:** The job requires extensive travel within the county in rough and isolated terrain. The candidate will frequently work alone. It includes the operation of a four wheel drive vehicle, a UTV, or an ATV.

**Closing Date:** The position will remain open until filled.

**Compensation:** $32,000 to $42,000 annually depending on education, skills, and experience. The District pays 100% of the state retirement and 85% of the health insurance coverage through Fremont County Government.

**Application:** Please submit a cover letter, resume, and 3-5 references
