

National Forest Acres Infested with Invasive Plants as of Nov 22, 2011			
Region	Total Acres	Infested Acres	% Infested
01	25,486,392	824,638	3.40%
02	22,107,981	429,766	1.94%
03	20,806,623	105,853	0.51%
04	31,959,717	421,928	1.32%
05	20,216,472	76,854	0.38%
06	24,763,890	155,978	0.63%
08	13,351,289	51,091	0.38%
09	12,120,187	84,336	0.70%
10	21,965,908	13,675	0.06%
National Total	192,778,459	2,164,119	1.12%

Percent of Infested Acres Treated in FY 2011 as of Nov 22, 2011			
Region	Infested Acres	Treated Acres	% Treated
01	824,638	76,127	9.23%
02	429,766	41,559	9.67%
03	105,853	15,822	14.95%
04	421,928	61,589	14.60%
05	76,854	8,208	10.68%
06	155,978	55,523	35.60%
08	51,091	19,719	38.60%
09	84,336	74,104	87.87%
10	13,675	331	2.42%
National Total	2,164,119	352,982	16.31%

Notes: Infested acre values come from the NRIS Invasives Database. Accuracy is dependent on the amount of the Forests which have been inventoried and accurately entered into the database system. In some cases, widespread infestations of species such as Canada thistle have not been entered. In other cases, inventories have largely been based on associated projects such as timber sales and major areas of the Forests have not been inventoried. As Forests continue inventories and treatments, this data is updated.
